TYPE: Single Control Character	REGISTRATION NUMBER : **64**
	DATE OF REGISTRATION: August 20, 1982

ESCAPE SEQUENCE: ESC 7/12

NAME   LOCKING SHIFT THREE RIGHT (LS3R)

DESCRIPTION   A code extension control function which is used in con-
junction with other locking shift functions as specified
in ISO 2022, to extend the graphic character set of an
8-bit code. LS3R is a locking shift function which invokes
the set of graphic characters currently designated as a
G3 set into positions 10/01 to 15/14.
*NOTE - Although LS3R is not intended to be used in a 7-bit code, it
may be encountered in a 7-bit environment as a result of transforma-
tion of data originating in an 8-bit environment. It then invokes
the set of graphic characters currently designated as a G3 set, into
positions 2/1 to 7/14.*
