Name:	Codes for the Blissymbol Graphic Character Set																														
Description:	<p>A two-byte graphic character set of 2,304 characters, to satisfy the need for communications of Blissymbols. Blissymbolics (Semantography) is a language with "words" being independent ideographic symbols structured so as to make it relatively easy to teach. The language has a simple grammatical structure making it especially useful for those with communications, language and learning difficulties. It is another ideographic system similar to Chinese characters.</p>

Field of Utilization:	<p>Data Communications, Text Communications, Telematic Services where the Blissymbolics language is used for communications, language, and learning difficulties.</p>																														

1. Description of the Character Set

The character set consists of the general characters, indicators, ordinal numbers, and Bliss symbols of the Blissymbolics language, for a total of 2,304 graphic characters.

1.1 General Characters

There are 8 general characters including space, an error sign, and punctuation marks located in row 1.

1.2 Indicators

The Blissymbolics language allows for a number of indicators which may be combined with Symbols to modify their meaning. There are a total of 19 indicators located in row 3. Note that the graphic representation of indicators combined with symbols may vary dependent upon the presentation device.

1.3 Ordinal Numbers

There are a total of 10 numerical graphic characters located in row 1.

1.4 Symbols

There are a total of 2,267 base Blissymbols consisting of nouns, verbs, adjectives, adverbs and prepositions located in rows 16 to 40. Indicators may be combined with any of these symbols in the manner indicated in the *Notes* column of the symbol name list.

2. Representation

Two representations of the Blissymbol Graphic Character Set are presented. The first representation is in the form of a two-byte code table. The second representation is a list of names for each graphic character in the character set.

2.1 Layout of the Code Table

The code table is shown in 24 sections in the following order in order to accommodate a representation on regular size paper.

1	2	3	4	5	6	7	8	9	10	11	12
13	14	15	16	17	18	19	20	21	22	23	24

2.2 List of Names

The list of names gives the name of each graphic character in the Blissymbol Graphic Character Set along with its graphic shape and any relevant notes. Because this is a two-byte code table, the code table positions are given both in terms of the row 1 column position in the table as well as in terms of the first byte and then second byte bit combinations.
